

Enhanced Mathematics Program Application Form Grade 9

The PC Enhanced Mathematics Program is appropriate for a student who has demonstrated a high level of achievement in Mathematics combined with a strong work ethic. This program will cover mathematical concepts more quickly but will also allow for sufficient depth of understanding and application of material to push the students to solve challenging problems and prepare them to study AP Calculus in Grade 12. Students will also be challenged throughout the year to prepare for and write several Math Contests.

Please give the second page of this form to your current Mathematics teacher and have them complete it and return it directly to Guidance at Pickering College.

Student's Full Name: _____

Current School (include city/town): _____

Current Mathematics Teacher's Name: _____

School Grade for 2010-2011: _____ Current Mathematics Average: _____

Why does the Enhanced Mathematics Program interest you?

I am excited about this program and I agree to put forth the effort required to be successful. I understand that if I can't meet the expectations of the enhanced course I will be placed in the regular Academic stream.
